Overall strategy

Regional Differentiation Credit Policy

**Bio-pharmaceuticals,
new materials, new
energy, energy
saving and
environmental
protection industries**

**Out-dated
production
technology in the
chemistry, steel and
so on**

The Industry Green Credit Policy

● **Meet or exceed the applicable standards**

● **Adopt energy-saving technologies**

● **Use recyclable or renewable resources**

In line with green energy efficiency products

Credit Assessment

- **Energy consumption and pollutant emissions indicators**

Credit Support Policies

- **Energy-saving environmental protection standards, recycling and low-carbon emission economies**

Green Credit Classification

Whole Process Management

Environmental Risk Management

ICBC's environmental risk management responsibilities are firstly divided between our Head office and our branches. The emphasis on risk monitoring, early warning, prevention and control management strengthens the supervision and evaluation process

ICBC Head office will promptly warn to all branches by publishing and notifying a follow-up supervision list for enterprises in violation of environmental regulations or with environmental risk.

Product and Services Innovation

Closing remarks

ICBC is willing to cooperate with you, to continue to practice green finance, to achieve the harmonious development of society and ultimately rebuild together the place we call home! Thank you !
